

Clarissa

Jason

Jane

Mario

"I got lost in the moment when he said he loved me."

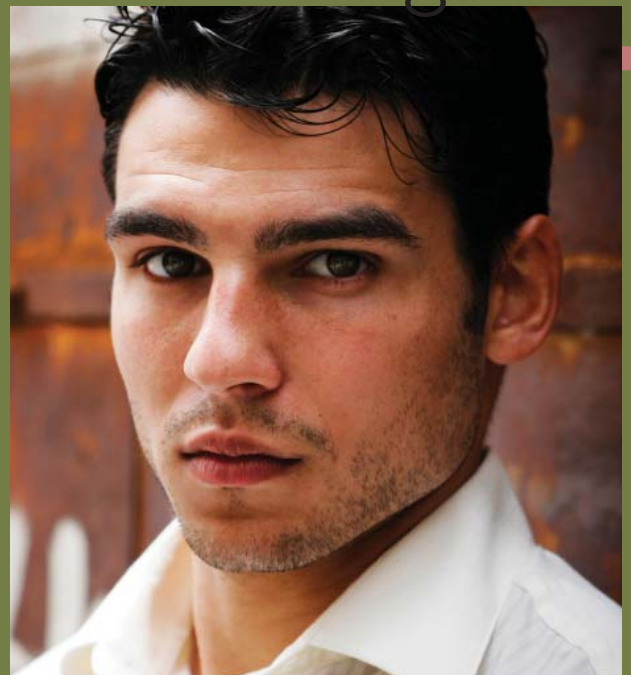

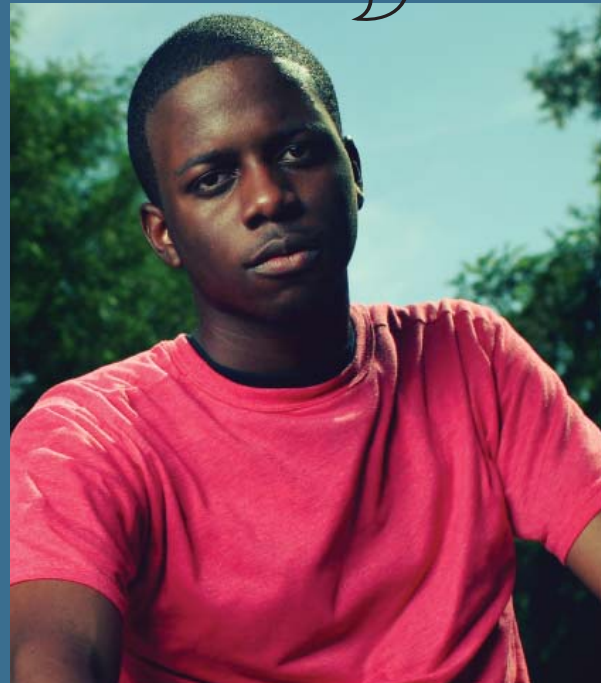

Jason likes to go clubbin'. Last week he ran into ex, Jane. They had a quickie in the car but didn't use protection.

"I can tell by looking if a guy is safe to sleep with."

Mario spent time in prison, where he had unprotected sex. Even ex-wife Rita didn't know he sometimes had sex with men.

"Ain't nothin' wrong with sex for old time's sake."

"What my girlfriends don't know won't hurt them."

Clarissa is normally very cautious. But last night, she and Jason didn't use protection. Now she's worried about HIV.

Jane's a party girl. When she drinks, she just can't say "no." On Ladies Night, she hooked up with Mario.

FACT:
Using a condom is the best way to protect yourself against HIV, but only abstinence is 100% effective.

FACT:
Having multiple partners puts you and your loved ones at higher risk for STDs and HIV.

FACT:
Many people with HIV have no symptoms and don't know they're infected.

FACT:
Men who have unprotected sex with men expose themselves and their partners to greater HIV risk.

Rita

Steven

Six people. Six excuses.
So many chances to get HIV.

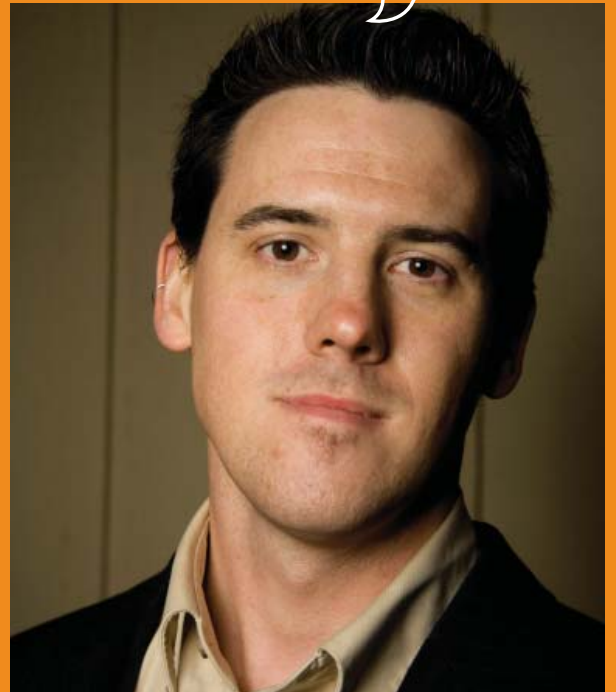

"My past is behind me. I'm in a relationship and I don't have to worry about HIV."

In her younger days, Rita never used protection. Now married to Steven, she has never been tested for HIV.

Steven is aware that HIV is out there, but he doesn't see how it could possibly affect him now that he's married.

"Why should I worry about HIV? Rita and I are in a committed relationship."

FACT:
If you've ever had unprotected sex, you should be tested for HIV.

FACT:
HIV can be transmitted without any signs or symptoms.

If you have sex, use a condom.
If you've had unprotected sex, get tested.

Contact us for **FREE**, confidential HIV testing.
